

# Sensory Bottle Fun!

One simple DIY idea for curious hands and watching eyes

A SEE US KIDS FAMILY ACTIVITY

## What can sensory bottles offer?

Children can tip, turn, and watch the color and glitter move. This invites visual exploration, noticing, and cause-and-effect play. Some enjoy a quiet moment; others enjoy the activity. It can be explored independently when safe, or shared.

## Galaxy Swirl

BLUE + PURPLE COLOR WITH SLOW-SWIRLING GLITTER

### Make it

1. Mix about 4 parts warm water with 1 part clear school glue.
2. Add a few drops of blue or purple food coloring and fine glitter.
3. Leave room at the top, close securely, and swirl gently to mix.

### Tap a supply bubble to shop

Clear glue

Blue-purple food color

Fine glitter

### Grown-up help: make, seal, and check

Use a sturdy plastic bottle and secure the lid. Supervise young children; keep bottles away from mouths. Inspect before use and discard if cracked, leaking, or loose.
